

**Our Chess Boards are highly flexible in their design giving you the option to create your own bespoke chart, you can choose the colour of your fabric, the colour of your threads, the design for the squares and the design for the border. You can also choose to have a message added in the border of the board giving the name of the recipients, if it is to be a special gift, or your own name and date of stitching. Please remember to take into account that any change to the designs may also change the final design size from that shown in our product range.**

**All we ask is that you give us a little longer to deliver these bespoke kits as we will have to make up the charts and obtain any non-standard coloured fabric or threads.**

**Alternatively, you can choose to complete your board in the colours and designs shown in the images on the website. If you wish to do this then you need read no further but just order the kit from our product range.**

**If you are looking to design your own chart please complete the next section providing us with contact details in case we have any questions about the designs you have chosen.**

### 5. Designing your Board:

Now please tell us which design you would like in each position of your chart. When working on light fabric the designs will be sewn as the 'black' squares and when working on dark fabric the designs will be sewn as the 'white' squares.

There are a total of 32 squares which can be sewn and you can choose one design for all 32 squares or any number of designs across the board.

### 6. Choosing a message:

You may want to personalise your Chess Board by adding some text, for example your name and date of completion of the board or the name of the people who will be receiving it. This text will sit in the border either at the top of the board or at the bottom.

Here is an example, this would measure 2.5cm/1 inch on 18 count Aida:

There is limited space within the border so think carefully about the number of characters to be used including any spaces. Please add the text you would like to use in the box below, please make sure it is in the format you would like to see it (i.e. Upper and Lower case and the words are on the correct line) this will ensure that your chart is correct:
